PROFESSIONAL SUMMARY

Detail-oriented BTech student specializing in CS & AI with hands-on experience in data analytics, machine learning, and business intelligence. Proficient in building end-to-end data pipelines, creating interactive Tableau dashboards, and applying statistical methods to extract actionable insights. Adept at translating complex datasets into compelling narratives that drive data-driven decision-making.

CORE SKILLS

Python (Pandas, NumPy, Matplotlib, Seaborn) | SQL & MySQL | Tableau | Excel
Machine Learning (Scikit-learn) | TF-IDF | Statistical Analysis | Data Cleaning & Visualization
FastAPI | REST APIs | Data Storytelling | Business Intelligence

ANALYTICS PROJECTS

FinSight AI — Financial Analytics Platform

2024

React, TypeScript, Tailwind CSS, FastAPI, Python, Pandas, Scikit-learn, OpenAI API

- Built an end-to-end pipeline for transaction data upload, preprocessing, and structured financial analysis.
- Implemented TF-IDF vectorization with Multinomial Naive Bayes for automated expense categorization with high accuracy.
- Designed REST APIs for data upload, analysis, chart generation, and AI-driven insights delivery.
- Generated visual reports using Matplotlib and Seaborn to surface spending trends and financial patterns.
- Integrated a conversational AI assistant enabling natural-language queries on financial datasets.

Data Analytics Portfolio — Tableau Dashboards

2024

Tableau, Data Cleaning, Statistical Analysis

- Netflix Content Dashboard: Analyzed content distribution across genres, countries, and release years; visualized Movies vs TV Shows growth trends.
- Diabetes Health Indicators Dashboard: Built a multi-dashboard system correlating glucose levels, BMI, and age with diabetes risk; applied slicers and filters for interactive exploration.
- Applied end-to-end data cleaning, aggregation, and storytelling techniques to highlight decision-relevant insights.
- Demonstrated proficiency in KPI design, trend analysis, and presenting data for non-technical stakeholders.

EDUCATION

Bachelor of Technology — Computer Science & AI

Expected 2028

Rishihood University, Sonipat

CERTIFICATIONS

- Problem Solving (Basic & Intermediate) — HackerRank (August 2024)
- Python (Basic) — HackerRank (June 2024)
- 300+ problems solved on LeetCode — strong algorithmic and data manipulation foundation

SOFT SKILLS

Analytical Thinking | Attention to Detail | Data Storytelling | Communication | Problem-Solving | Collaboration
