of Technology

PROFESSIONAL SUMMARY

AI-first systems engineer building intelligent applications using LLMs, modular architectures, and deep backend design. 2+ years of experience across MERN, React Native, and real-world fintech systems.

EDUCATION

Bachelor of Technology (Artificial intelligence)	2024 - 2028
Newton School of Technology, Rishihood	Grade: 8.174%
Intermediate (Class XII)	2023 - 2023
Yuvraj Public School, Batta	Grade: 70.0%
Matriculation (Class X)	2020 - 2021
Delhi Public School, Kaithal	Grade: 87.0%

EXPERIENCE

SDE 1	August 2022 - March 2024
Unipe	Remote
Developed the Unipe mobile app from scratch using React Native, along with backend services, microservices, and admin portals.	
Mobile App Engineer	May 2022 - August 2022
Binaryveda Solutions	Remote
Worked on the Kotak Buy-Now-Pay-Later mobile app UI and collaborated with the Kotak team and third-party developers for backend development.	

PROJECTS

Credit Card Customer Retention Analytics (Github) (Demo)	April 2026
This project presents a data-driven analysis of a bank's credit card subscription outreach campaign. Using 30,488 customer records, we analyzed demographic and operational variables to identify high-conversion segments and optimize marketing efficiency.	
The objective is to reduce wasted outreach efforts and improve overall campaign ROI through targeted segmentation and engagement optimization.	
Diabetes Readmission Analysis (Github) (Demo)	April 2026
Diabetic patients represent a significant portion of hospital admissions, and readmission rates remain a critical challenge for healthcare providers. This project analyzes a decade of clinical data from 130 US hospitals to identify factors contributing to patient readmissions within 30 days. By identifying high-risk characteristics and treatment patterns, hospital administrators can optimize discharge planning and post-care strategies to improve patient outcomes and reduce healthcare costs.	

CERTIFICATIONS

Smart India Hackathon Winner (Team Lead) Government Of Punjab and AICTE (Link)	December 2025
Team Lead – SIH Winner — Led end-to-end design and development of a Fleet Passenger Management system for Government of Punjab in 36 hours.	

SKILLS

Computer Languages: Machine Learning, TypeScript, HTML, CSS, JavaScript, C++, Python, Java
Software Packages: Pandas, Matplotlib, Figma, Tailwind, Next.js, Tailwind CSS, Next JS, React Native, React, Redux, Node.js, Express JS, MongoDB
Additional Courses: Data Structure
Others: Git and Github, Docker, Firebase, Canva, UI/UX, LangChain, OpenAI API, GenAI, LangGraph, Hugging Face, Supabase, AWS, LLM

EXTRA-CURRICULAR ACTIVITIES

- Currently Leading a Team at AI Studio for making a Research Paper on Modular LLMs
- I used to teach Coding on Youtube (26k+ Subscribers) ([Link](#))
- Product Head at College Consulting Club (Arthakram)
- Achieved 1st Position in University Inter-clan Football competition
- Achieved 2nd Position in Badminton Inter-clan competition
